> PRIVA TOUCHPOINT ONE HOTEL

The elegant and user-friendly control device for your hotel guests

Whether your guests have been travelling all day, are working away from home or enjoying a vacation, when they get back to their hotel room they want to feel comfortable and at home. The inviting user interface of the Priva Touchpoint One Hotel makes sure your guests will feel right at ease. This new operating device for hotel rooms has several features, that create a high level of personal comfort for your guests in their hotel room. It is easy to use and gives your guests the opportunity to create a personalised climate. It assures the optimal comfort level and an outstanding climate experience for every guest, right at their fingertips.

The minimalistic and modern design of the Priva Touchpoint One Hotel includes an LED display and touch screen, which controls the preferences in the room. The Priva Touchpoint Hotel also displays specific user feedback, such as icons indicating cooling, heating or an open window. This saves the user time and frustration, because your guests can understand and know what the system is doing at any time.

International guests will also feel right at home, as the control panel uses generally known icons that are easily understood, even without speaking the local language, or any language at all actually! All guests can choose to display the temperature on the Priva Touchpoint One Hotel display in Celsius or Fahrenheit.

Comfort available for your guests, right at their finger tips!

Operational excellence

The Priva Touchpoint One Hotel is the newest member of the Priva Touchpoint One family. The various functionalities of the Priva Touchpoint One Hotel not only generate ultimate guest satisfaction, but also enable you to manage your hotel in the most efficient manner.

The integrated "Make up Room" and "Do not Disturb" request buttons are tailored specifically to the Hospitality Industry and make it possible to display the status of each room centrally, allowing you to optimize the scheduling of the cleaning staff.

The icons on the Priva Touchpoint One Hotel display prevent and solve customer issues. For example, if the climate control is turned off because an open window has been detected, guests can clearly see this on the display. This avoids unnecessary efforts for the hotel maintenance staff in trying to troubleshoot the problem.

In short, these features can save you and your staff time and effort. Whilst your guests can enjoy a comfortable hotel experience.

Features

- > **Wake up display:** the device activates when the guest approaches.
- > **"Do not disturb" and "Make up room" request buttons:** for clean rooms and seamless integration with your PMS (Property Management System).
- > **Temperature and ventilation control:** at your guests' fingertips.
- > **Celsius/Fahrenheit toggle switch:** to make all international guests feel at home.
- > **User feedback on display:** such as an open window icon to prevent energy waste, heating and cooling icons so your guests know what the system is doing.
- > **Two front colour choices (black and white) and customized colours for the back shell:** to fit every design.
- > **Customized logo possible in consultation:** to really customize your Priva Touchpoint One Hotel.
